## POTHOLING EQUIPMENT

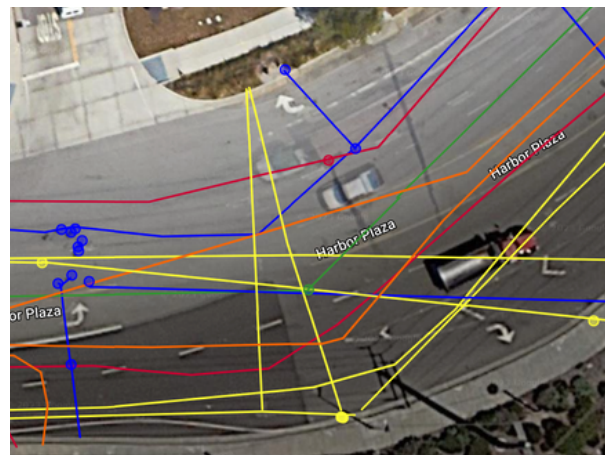

The Rival T7 Semi Hydrovac is a key enhancement to our fleet, boosting our potholing and utility locating capabilities. This machine adeptly blends hydro excavation and semi-truck mobility for precise excavation. User-friendly controls and an ergonomic design improve operator productivity and safety. The Rival T7 underlines our commitment to delivering excellent potholing results and efficient projects.

## POINTMAN SOFTWARE

PointMan is a patented cloud and mobile mapping software application that captures, records, and displays the location of buried utilities and pipelines with unprecedented precision and the associated metadata including the type, the depth, and the depth of cover.

## CLIENT TESTIMONIALS

**Adam Brown**  
Principal Engineer

"2M provides quality services related to locating, mapping, and visualizing underground utilities. **They have the skills, tools, and personnel to provide accurate mapping and next-generation deliverables** to help you visualize and communicate your project and/or facility details. As a pipeline designer, I appreciate their commitment to service and the reliable results that they provide."

**Atosa Abedini**  
Project Manager

"As a construction project manager at UC Davis Health, I need utility locating often. 2M is quick, responsive, affordable, and very detail oriented. **Their latest service of flying a drone over the project area for an aerial photo along with marking the utilities on that aerial map, is outstanding.** You don't have to worry about rain or traffic erasing the markings. I recommend them highly!!!"
